

Cleaning and Maintenance

The Castle Serenity features an innovative design that makes cleaning your pellet stove easier than ever.

| | |
|-------------------------|---|
| Before Igniting: | <ul style="list-style-type: none">▪ Dump firepot remnants from previous fire in ash pan |
| Every 2-3 days: | <ul style="list-style-type: none">▪ Clean glass▪ Empty ash pan |
| Weekly: | <ul style="list-style-type: none">▪ Brush-down and vacuum-out firebox with ash vacuum |
| Monthly: | <ul style="list-style-type: none">▪ Visually inspect exhaust vent to determine if cleaning is necessary |
| Annually: | <ul style="list-style-type: none">▪ Remove and clean exhaust venting▪ Remove and clean exhaust motor housing and impellers |

Note: Cleaning your pellet stove is a very important part of ownership. A dirty stove will burn inefficiently and shorten the overall life of the stove. A well-maintained stove will continue to provide efficient heat to your space for many years.
