

## Serenity Pellet Stove

<b><u>Heating Capabilities</u></b>	
<b>Heating Coverage</b>	<ul style="list-style-type: none"><li>▪ About 1500 Square Feet</li><li>▪ May be greater in well insulated spaces</li></ul>
<b>BTUs</b>	<ul style="list-style-type: none"><li>▪ Input – 32,000</li><li>▪ Output – 9,575-22,226</li></ul>
<b>Approximate Burn Time (per 40 lb bag)</b>	<ul style="list-style-type: none"><li>▪ Low – 24 hours</li><li>▪ Med – 16 hours</li><li>▪ High – 11 hours</li></ul>

The Serenity Pellet Stove heating coverage is partially dependent on the insulation levels in your home, your desired controller mode (weekly, thermostat or manual) and other factors. For example, a well-insulated home may exceed the 1500 square feet of heating coverage while a poorly insulated home may fall below that estimate.
